Elegantly crafted

# About Us

At Greenbridge Designs we work closely with public and privately-owned cemeteries and crematoria to deliver our extensive range of beautifully built mausolea, vaults and cremation memorials.

We pride ourselves on delivering products and projects with architectural merit, structural integrity and a reliable, friendly service to provide a lifetime of satisfaction.

Our parent company, Willcox Granite, is the largest wholesale supplier of memorials in the UK, with a 45-year history of creating proudly crafted memorials from our state-of-the-art factory facility in the Cotswolds. The result is a modern service with the latest software and machinery, combined with a hard-to-rival heritage and a skilled and experienced workforce.

No matter whether your needs are small or large, a plaque memorial or a 500-chamber mausoleum, we provide the same exacting standards and a reliable, friendly service.

We offer a strong and experienced team to manage your project from your initial vision to final delivery and beyond. From architects and engineers to designers and installers, every aspect of your project will be beautifully crafted, professionally managed and reliably completed to the highest standards.

If you'd like more information on anything contained in this brochure, or would like to talk through your specific requirements, you'll find us ready and willing to help.

# Cemeteries

Our mausolea are not only engineered to the highest standards but designed to add architectural merit to your cemetery landscape. As well as our standard range of affordable, elegant building designs, Greenbridge Designs can work with you to develop bespoke buildings to complement existing architecture.

Our extensive range of below ground vaults can be clad in a range

of granites and stone to create an attractive, practical standardised memorial scheme.

Our team of architects, structural engineers and designers can create something that is not only unique but designed to last for generations. Our build team will ensure that your vision is expertly brought to fruition with minimum disruption.

# Mausoleum Project

Islington & St. Pancras Cemetery, London 2019.

This recently completed mausoleum project shows an example of 'The Clifton Crescent' mausoleum, designed and built in this iconic London cemetery by Greenbridge Designs for Islington and Camden Cemetery Services (ICCS).

This impressive build was specified with 186 chambers, each large enough to accommodate American caskets and each with a corresponding lockable niche for securely holding keepsakes or cremated remains.

Greenbridge's designers worked closely with the ICCS project team to create a number of visualisations and rendered images until every last detail had been explored and agreed. Greenbridge Designs' technical capabilities allowed the designs to be digitally placed within images of the actual location in order to accurately demonstrate what the final build will look like within the landscape. We believe the result was a total success. It is very difficult to distinguish between the computer-generated final designs and photographs of the final build.

Once the plans had been approved, the materials, manufactured to the exact radius of the arc design, were on-site and with our health and safety plans in place, our fully trained and skilled build team started work. Foundations prepared, specialist machine operatives lowered the large, reinforced concrete chambers and keepsake niches with meticulous care around the curve of the foundations. The back-to-back chamber design allows for drainage to be elegantly hidden from view within the structure, whilst cleverly concealed access panels allow for future maintenance.

The installation continued over an 11-week build time, finishing with powder coated aluminium niche doors, natural quartzite stone finishing and a Firestone EPDM roof, all guaranteed for 30 years. Greenbridge Designs' final stage of the build prior to opening in August 2019 was to apply the resin bound surfaces. Soft planting brings an air of peace and tranquillity to this new, prestigious mausoleum area.

Completed Build

# COMMUNITY MAUSOLEA

## Clifton & Clifton Crescent

The 'Clifton' and 'Clifton Crescent' are elegant community mausoleums inspired by contemporary Italian architecture. The Clifton's clean lines and classic design ensures that it can seamlessly integrate into existing cemetery schemes as effortlessly as it can into new-build sites. The 'Clifton Crescent' adapts the same build principles of high-quality materials matched with clean, contemporary design that will adorn the grounds of any cemetery. The beautiful curved lines can be altered to accommodate the surrounding landscape. Each mausoleum can be made to the radius required to ensure a perfect build. The scalable designs provide architecturally pleasing buildings whether the requirement is for 12 chambers or 112.

### Key Benefits:

- Oversize LACO compliant chambers large enough to hold American caskets.
- Engineered to Eurocode standards for monumental buildings with a 100-year design life.

- Glass-fibre reinforcement to eliminate rust bleed from metal strengthening.
- Choice of decorative panel colours.
- EPDM roof prevents water ingress, guaranteed for 30 years.
- Fully clad in a choice of natural quartzite stone materials.
- Choice of plaque colours and materials.

### Options:

- Secure niches to hold ashes or keepsakes.
- Active carbon filtration.
- Stainless steel or polycarbonate chambers.
- All granite chamber construction.

Powder-coated, lockable doors designed to hold keepsakes or ashes. The glass panels can be substituted for granite if preferred. The interior shelf can be removed if a full height niche is required to display taller items such as flowers. The central transom can be removed to provide an uninterrupted view.

# The Hallingbury

The Hallingbury is a modern mausoleum design with chambers on all four sides of the building. The exterior of the Hallingbury is a combination of large granite plaques with bronze fixings and quartzite natural stone cladding. Frames and building trims are in powder-coated aluminium as are the optional canopy frames. The canopies and windows provide shelter and natural light.

The design allows the communal space to be developed into a chapel, complete with stained glass windows, pews and an altar. This element of the design is flexible and can be designed as simply or ornately as required.

The Hallingbury makes excellent use of space and can be configured from 36 to 72 chambers. Canopies and walkways have been designed to link the mausoleum together to create a scalable, covered area for bereaved families to visit comfortably throughout the seasons.

### Key Benefits:

- Oversize LACO compliant chambers large enough to hold American caskets.
- Covered communal area.
- Choice of decorative panel colours.
- EPDM roof prevents water ingress, guaranteed for 30 years.
- Fully clad in a choice of natural quartzite stone materials.
- Choice of extra-large plaque colours and materials.
- Bronze fixings.

### Options:

- Light aluminium frames, powder-coated in any RAL colour.
- Active carbon filtration.
- Stainless steel or polycarbonate chambers.
- All granite chamber construction.

# The Medway

The Medway is a traditionally built, dual-winged building designed to house between 24 and 60 chambers. The bi-fold doors and large picture windows allow plenty of light into the building, creating an airy ambience whilst providing an enclosed, secure space for quiet contemplation all year round.

The Medway has a cross gable roof over a large communal area that can be developed into a chapel if required.

The traditional, classic styling of the Medway enables it to fit easily into schemes with both modern and traditional surroundings. All sides are rendered in your choice of decorative panels so that no side looks unfinished and the building can be approached from all directions.

The Medway can be configured with multiple blocks of differing sizes and sits well alongside our other mausoleum products for when you'd like a variety of buildings in your scheme.

### Key Benefits:

- Oversize LACO compliant chambers large enough to hold American caskets.
- Fully covered communal area with exterior doors.
- Choice of decorative panel colours.
- Traditional build.
- Dual aspect roof.
- Fully clad in a choice of natural quartzite stone materials, render, stone or brick.
- Choice of extra-large chamber plaque colours and materials.
- Bronze fixings.

### Options:

- Active carbon filtration.
- Stainless steel or polycarbonate chambers.
- All granite chamber construction.

# FAMILY MAUSOLEA

## Family Mausolea

The family mausolea can be designed and built to individual specifications. The images here are a small sample of designs created by Greenbridge Designs, all of which have either been built or are currently being completed.

### Features:

- Bespoke design.
- Oversize LACO compliant chambers large enough to hold American caskets.
- Engineered to Eurocode standards for monumental buildings with a 100-year design life.
- Glass-fibre reinforcement to eliminate rust bleed from metal strengthening (where used).
- Decorative panels.

### Options:

- Choice of decorative panel colours.
- Active carbon filtration.
- Stainless steel, polycarbonate GAC or granite chamber construction.
- Choice of plaque colours and materials.
- Choice of decorative panels.

At Greenbridge Designs we can create mausolea from our existing designs or tailor them to individual requirements. This is just a small selection that our design team has already created for customers. If you have something particular in mind, we'd love to talk to you about it.

◀ A Greenbridge Designs bespoke, all granite three chamber family mausoleum complete with natural slate roof, double-glazed windows and doors.

# BURIAL VAULTS PROJECTS

The installation of burial vaults always starts with a site survey to assess the topography, existing structures, services, soil type and drainage. The layout and design of a vault installation should be meticulously and thoughtfully planned; something that Greenbridge Designs carries out with its fully trained, professional support team.

Greenbridge Designs takes health and safety seriously, which is the reason we have employed a nationally recognised consultancy firm to independently assess the work we carry out on our cemetery and crematorium projects. With assessment of our paperwork and regular on-site inspections our staff and customers are assured that all necessary guidelines are adhered to.

As with all major projects that Greenbridge Designs carries out, the design drawings are agreed and adhered to throughout

the build, and regular meetings with the client throughout the process ensure that projects are delivered as expected, safely and on-budget every time. Disruption is kept to a minimum and operational needs are prioritised.

The installation shown here in Seafield Cemetery, Edinburgh, required a fully clad and memorialised solution, one which Greenbridge Designs created specifically for this project. The design was also revised to add a foundation for the headstone, allowing interments to take place without removing the granite headstone. The granite lid was made in three pieces for ease of removal.

Rendered Design

Completed Build

# Burial Vaults Projects

The second installation, shown here at New Southgate Cemetery was part of Westerleigh Group's 'Grave Re-Use' project and required meticulous plotting and planning prior to works commencing. Numerous test digs were carried out to ascertain existing burial depths, and complex groundworks and drainage analysis were planned and carried out prior to installation. The resin bound pathways ensured ease of access on the slope and provided a hard-wearing, maintenance-free surface for ease of funeral operations. The slatted concrete lids were then covered with a powder-coated lid to prevent water ingress prior to burial.

# Burial Vaults

Greenbridge Design's Burial Vaults conform to the highest specifications and can be specified with a number of different cladding options and memorial designs. If you have something specific in mind, please get in touch and we will help you to make your vision a reality.

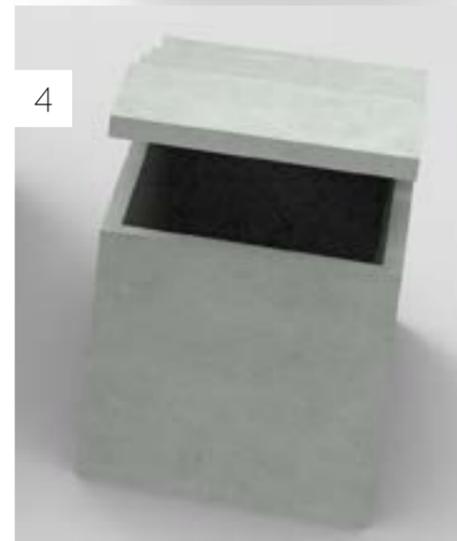

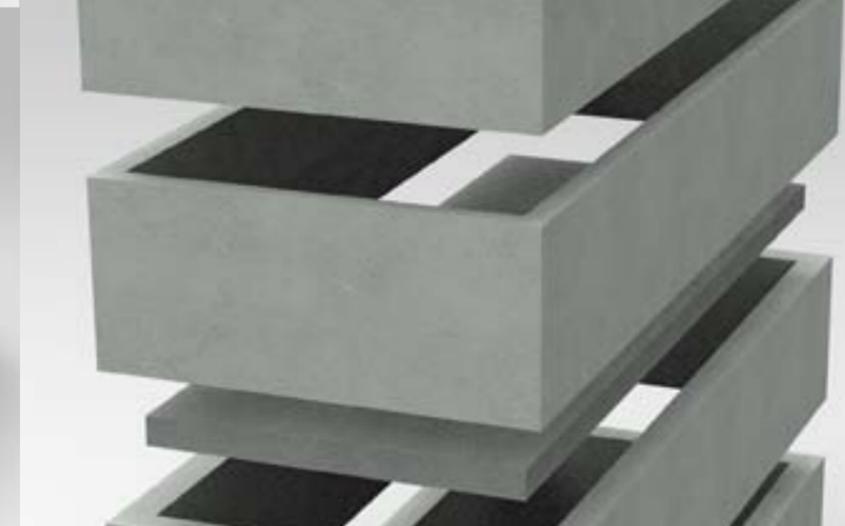

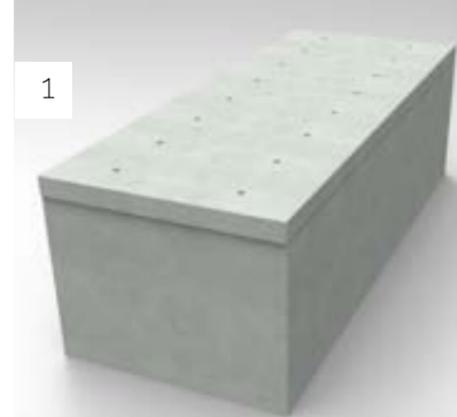

Granite provides a luxurious alternative to our pre-cast concrete vaults. Available as single or double depth and in a range of granite colours. The matching vault lids have either an all-polished or honed finish.

## Concrete Chambers

1. Single vault with base and slatted lids.
2. Muslim rings - available in different sizes with single piece or slatted lids.
3. Large double vault - to accommodate American caskets.
4. Children's vault with base.

Although a standard range of pre-cast concrete vaults are available from our concrete manufacturing facility here in the UK, Greenbridge Designs can offer a bespoke service to cast chambers and vaults to any size required.

# Concrete Manufacturing

**Relating to the manufacture of all Greenbridge Designs' burial vaults, mausoleum chambers and stone architectural products.**

**Environmental Management** - All pre-cast and architectural concrete products are manufactured in compliance with ISO 14001:2015.

**Quality Management** - All pre-cast and architectural concrete products meet the requirements of ISO 9001:2015 in relation to design, manufacture and supply.

**Health and Safety Systems** - The systems employed in the manufacture of all concrete products meet the requirements of OHSAS 19001:2007.

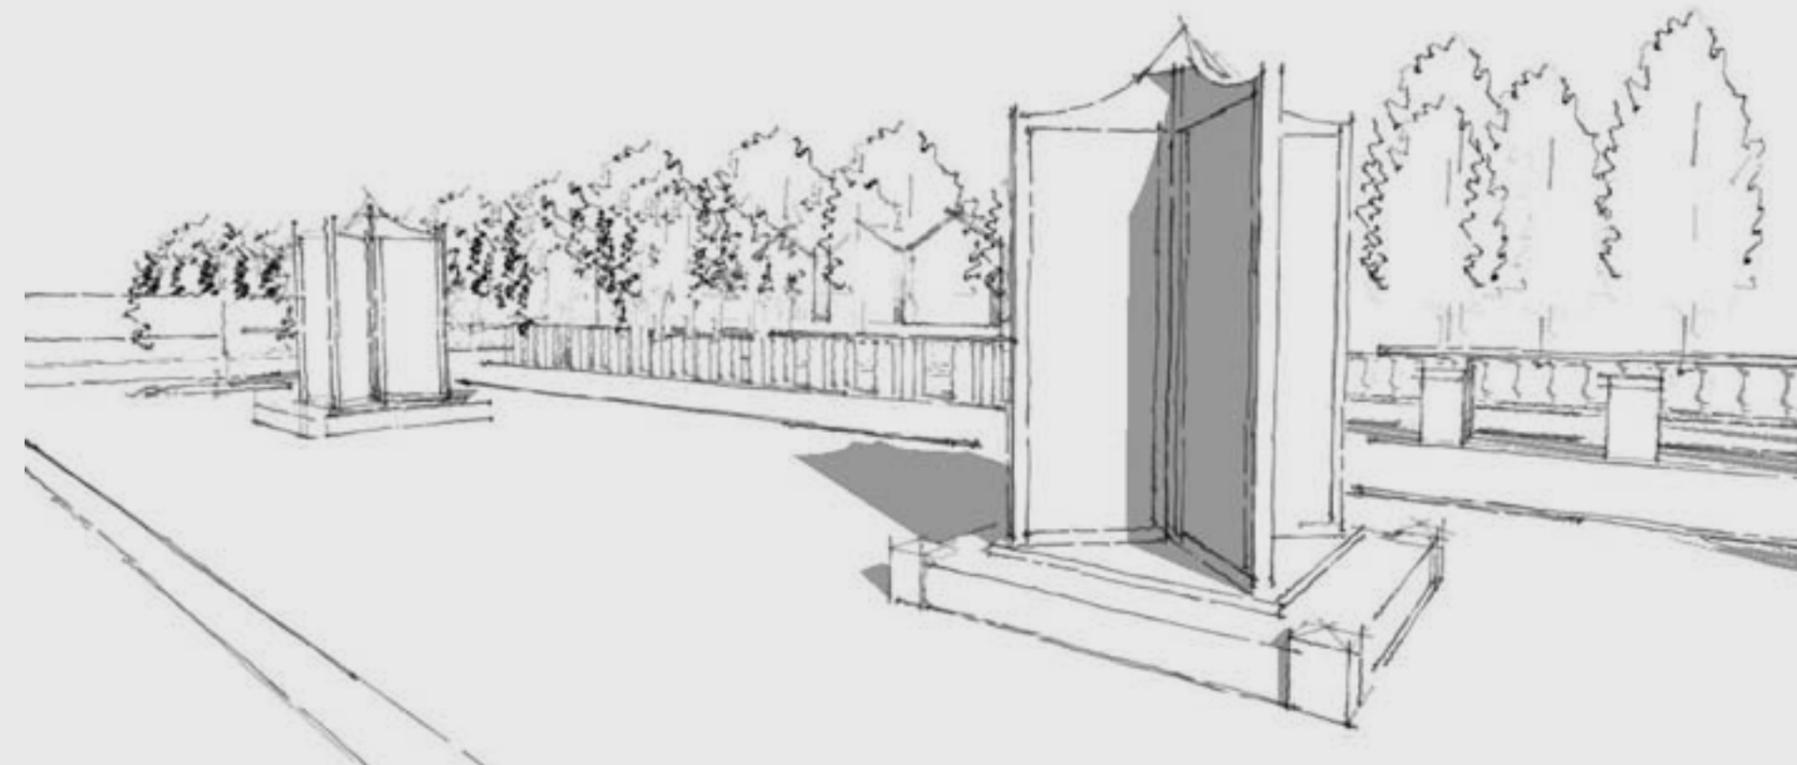

As a minimum standard, all concrete products conform to the Local Authorities' Cemeteries Order 1977 (LACO) standards.

Greenbridge Designs can provide all groundworks and landscaping services relating to the installation of burial vaults.

The standard products offered can be complemented with bespoke manufacturing if they do not meet your requirements.

Greenbridge Designs can clad the vaults with granite and memorialise as required.

# Crematoria

Greenbridge Designs manufactures and supplies innovative products that will add value and architectural merit to your remembrance gardens. Our extensive range of memorials combines the traditional with the modern; memorials that serve the needs of bereaved families in the 21st century.

Our NAMM trained installation memorial fixers and experienced customer service team will help you to realise the vision for your remembrance garden. Get in touch if you have any questions or specific requirements and we will be glad to assist.

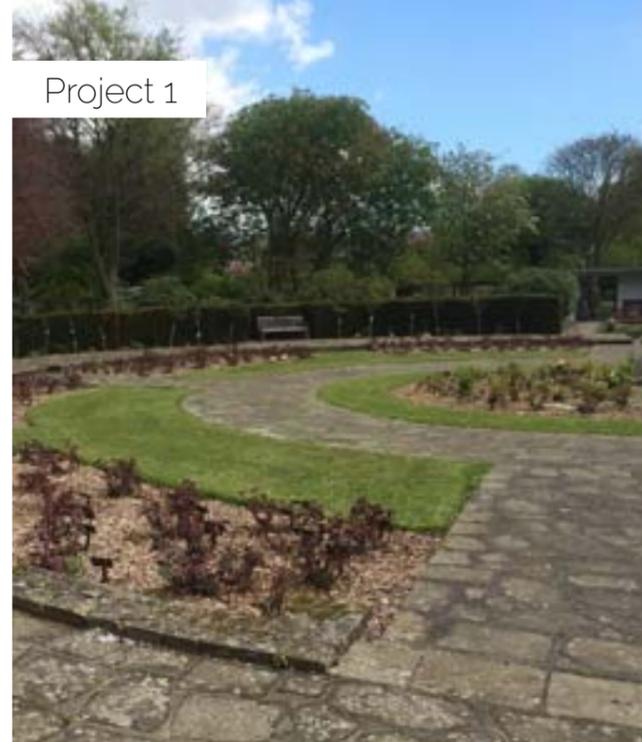

# Crematorium Memorial - Projects

These remembrance gardens were once an area of peace and tranquillity but, over the years, had fallen into disrepair. We were tasked with returning them to their former glory and providing a maintenance-free area that would serve the needs of the local community for many years to come.

We worked closely with the client to understand the desired look and feel, while ensuring the quantity and type of memorials was correct and suitable for future use.

To ensure we achieved this, we created a suite of existing and bespoke memorials and presented them as a series of area designs. These area designs enabled our client to visualise the bespoke memorials in situ and make any amendments easily. The project images demonstrate how close our computer-generated renders are to the final installed memorial scheme.

Once the scheme was agreed, the template for the 3500sq m site was created and manufacturing drawings produced. Tolerances had to be of the

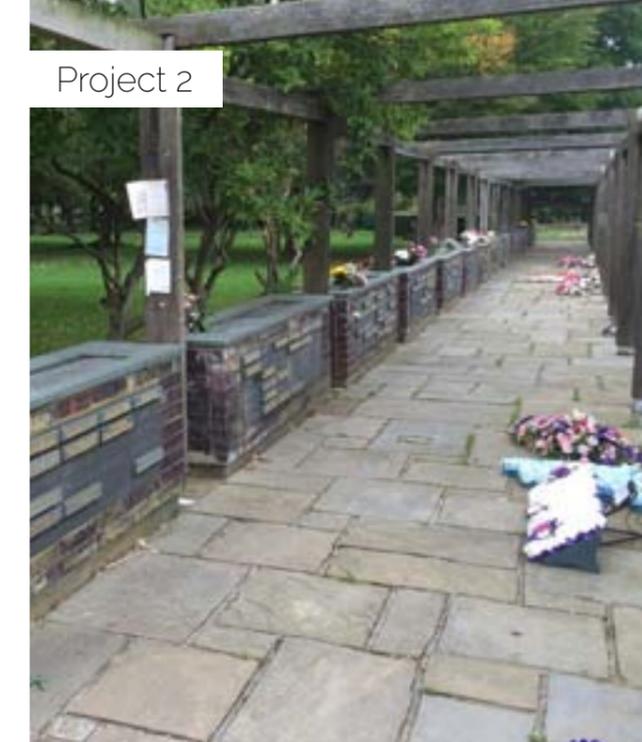

Project 1

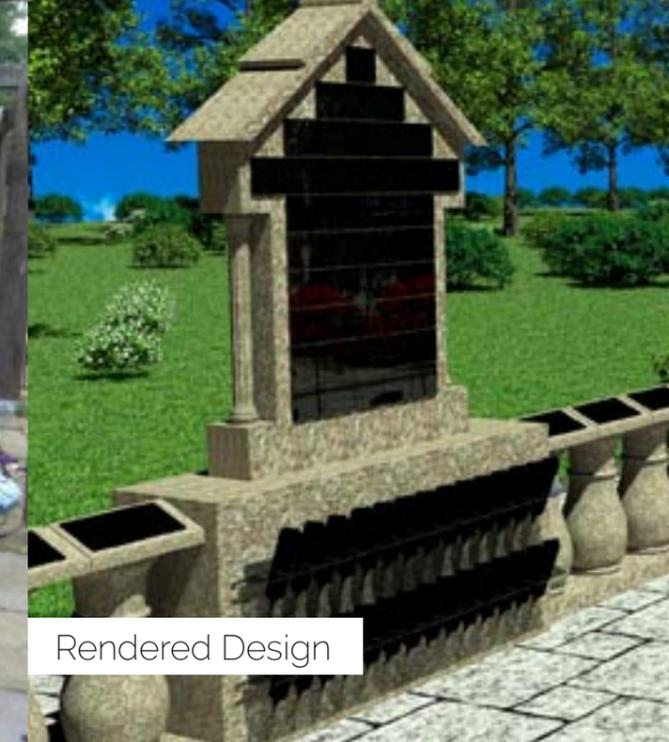

Rendered Design

Completed Build

Project 2

Rendered Design

Completed Build

highest order as managing slopes and radiuses gave little room for error.

Our grounds team got to work removing the unsafe pergola and memorial walls. They carefully removed the fragile slate plaques ready for integration into the new memorial. The existing surfaces were removed entirely, and the area excavated, before re-laying hard surfaces and foundations in readiness for the new memorial scheme.

It was of paramount importance to carefully choose the granite colours in order to soften the look as it is a large site using a large amount of granite. The memorial designs gave the scheme a beautiful, soft feel. From the curvaceous, stately balustrades to the towering Atlas Pillars, the design had to create interest across every angle and viewpoint.

Once the project was delivered safely and on schedule, we produced bespoke plaque inscription software, and provided training, to help our client manage future inscriptions.

# Interment Memorials

A range of above and below ground chambers for the secure containment of cremated remains. Each memorial has been crafted with a balance of form and function, available in a range of beautiful materials.

-  Tridents.
-  Wall Niches.
-  Leaf Vaults.
-  Monarchs.
-  Balustrades.
-  Orion.

## Tridents

A watertight, below ground interment memorial

This memorial allows for the below ground interment of two sets of ashes within a watertight chamber. The large, removable plaque is suitable for two inscriptions that, together with a kerb-set, mirrors the look of a traditional grave. The memorial is supplied with optional vases and granite pebbles.

As an alternative, the same below ground watertight chamber is capped with two different desk-type memorials. Removal of the plaque allows for direct access to the chamber without having to remove the memorial.

	Height x Width x Depth
<b>Trident</b>	40cm x 57cm x 57cm
<b>Ashes Chamber</b>	33cm x 33cm x 57cm
<b>Plaque</b>	27cm x 48cm

# Wall Niches

Wall space developed for ashes interments.

# Leaf Vaults

Single and double woodland inspired ashes vaults.

A modular niche system built to your bespoke requirements.

Greenbridge Designs' Wall Niches can be built as an entirely new structure or be incorporated into an existing wall.

The columbarium is finished with granite plaques and bronze fittings to create a unique and cost-effective memorial that maximises existing space.

Designs, sizes, materials and fixings can all be specified to meet your exact space and needs.

Our Leaf Vault is a handsome above ground ashes vault designed for use in less formal settings and in woodland gardens.

To complement the natural settings, these vaults have been created in Rainbow Sandstone and Juperana Granite.

	Height x Width x Depth
Large	76cm x 30.5cm x 18.5cm
Medium	46cm x 30.5cm x 18.5cm
Small	30cm x 18.5cm x 14cm
Vase	10cm x 18cm x 12cm
Plaque	18cm x 30cm

A smaller version designed for use in baby gardens is also available.

# Monarch Vaults

Small but perfectly formed.

A delightful above ground vault designed with three plaque shapes: the traditional tablet, modern heart or the ever-popular book-shaped plaque.

Each Monarch Vault securely holds two sets of ashes in a stainless steel, lacquered 3.5 litre urn or one traditional wooden casket.

This compact design allows for effective use of space along pathways or within small areas of available land.

	Height x Width x Depth
<b>Monarch Vault</b>	53cm x 48cm x 45cm
<b>Internal Niche</b>	25cm x 30cm x 21.5cm
<b>Book</b>	25cm x 30cm x 21.5cm
<b>Heart</b>	5cm x 40cm x 30cm
<b>Tablet</b>	5cm x 45cm x 30cm
<b>Rectangular Casket</b>	22cm x 14cm x 14cm

# Balustrades

Combining formal elegance with practical innovation.

These balustrades will beautifully define the perimeter of your garden to create an area of outstanding elegance and formality. The balustrades cleverly and securely house cylindrical ashes urns. Each section is fitted with a granite plaque for inscription.

A comprehensive design and installation service is offered with these memorials.

	Height x Width x Depth
<b>Balustrade (each)</b>	84cm x 45cm x 35 cm
<b>Plaque</b>	15cm x 35cm

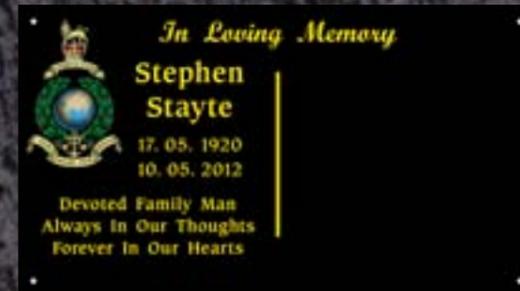

# Orion

Securely holds up to four sets of ashes.

# Callisto

The standard size Callisto columbarium provides 48 secure niches in an exciting, new, contemporary design.

Two designs of the vault are available; the smaller Orion 400 is a contemporary design that securely holds two sets of ashes, whilst the larger Orion 560, with its 'Ogee' roof design, holds up to four sets of ashes. The memorial plaques come in a range of granite colours.

	Height x Width x Depth
Orion 400	52cm x 39.5cm x 40cm
Orion 560	53cm x 39.5cm x 56cm
Plaque	40cm x 35cm

Each Callisto niche can securely hold two sets of ashes but can, if required, be redesigned to hold four sets to provide a long-term family vault. The new, modern design, with its dual colour granite and angular panels, can be scaled to provide a facility of between 32 and 64 niches. The memorial and plaques are available in a range of granite colours. Inscription area 300m x 300m. An extensive choice of emblems and designs can be added to the plaques.

	Height x Width x Depth
Callisto	200cm x 165cm x 165cm
Niche	30cm x 30cm x 30cm

# Community Plaques

An exciting range of community memorials that are ideal for placing adjacent to scattering lawns. This collection of memorials offers both traditional and modern designs, all of which occupy a small footprint to maximise the dedication opportunities within your chosen area.

- We understand the reluctance of families to purchase the plaques at the base of a memorial. Our designs maximise your revenue by only supplying desirable plaque positions.
- We can supply an almost infinite range of granite colours to ensure synergy with your existing scheme.
- A comprehensive inscription and design service is available for all plaques, but the choice of whether you use us for this is completely yours.
- Bespoke design changes are available if you require something totally unique.

## Arten Columns

A re-invented classic.

A range of 10-sided columns that can accommodate between 50 and 150 plaques. The Arten Column makes an impressive centre piece to any memorial garden, providing families with a simple but elegant place to remember their loved ones.

The Arten Column stands on a base incorporating 25 (optional 50) flower vases. The base can be extended to create a further 10 desk tablet plaques, extending the range to 160 plaques in total.

The Arten can be capped in a number of ways to create a unique feature memorial. The top

can also be configured to house a removable galvanised steel container to create the 'Arten Planter'.

The memorial and plaques come in a range of granite colours. Plaque sizes 200mm x 100mm.

An extensive choice of emblems and designs can be added to the plaques.

	Height x Width x Depth	Plaques
Large	213cm x 110cm x 110cm	150
Medium	160cm x 110cm x 110cm	100
Small	118cm x 110cm x 110cm	60
Plaque	10cm x 20cm	-

# Atlas Pillars

A modern interpretation.

The Atlas Pillar is a large and impressive feature memorial. The combination of tall, elegant panels and the addition of a mirrored stainless steel ball brings a timeless sculptural quality to your remembrance garden.

The 384-plaque Quad Atlas provides an extremely cost-effective solution with a small footprint.

	Height x Width x Depth	Plaques
<b>Tri-Atlas</b>	230cm x 120cm x 120cm	144
<b>Plaque</b>	10cm x 20cm	-
<b>Quad-Atlas</b>	275cm x 150cm x 150cm	384
<b>Plaque</b>	5.7cm x 28cm	-

# Granite Book and Chapel Memorials

A traditional, free-standing feature memorial.

With an optional cord and tassel design, the Greenbridge Designs' 180 and 80 plaque Granite Books are a fine addition to any remembrance garden.

Our Chapel design is designed to display 42 plaques either side. The base can be utilised to accommodate additional plaques and flower vases if required.

Taking up a small amount of space, these striking memorials are ideal for families looking to dedicate the scattering of loved ones' ashes.

	Height x Width x Depth	Plaques
<b>Large Granite Book</b>	170cm x 220cm x 85cm	180
<b>Plaque</b>	75cm x 15cm	-
<b>Small Granite Book</b>	145cm x 190cm x 60cm	80
<b>Plaque</b>	10cm x 15cm	-
<b>Base</b>	95cm x 160cm x 45cm	-
<b>Chapel</b>	144cm x 130cm x 15cm	84
<b>Plaque</b>	16cm x 11cm	-

# Woodland Wing

Providing 120 low-cost plaques.

This double-sided granite memorial accommodates 120 laminated plaques in a stylised leaf design.

An organic and imaginative memorial that offers a low-cost alternative to traditional granite plaques. The asymmetrical design would enhance any communal scattering area, particularly those in less formal surroundings.

Colour shown is Alpine Brown.

	Height x Width x Depth	Plaques
Woodland Wing Base	10cm x 160cm	-
Wing	145cm x 173cm x 15cm	120
Plaque (Large)	12cm x 8cm x 1cm	50
Plaque (Small)	9cm x 6cm	70

Woodland Wing Base holds 20 metal vases.

# Boundary Kerbs

Beautiful edging of straight and curved pathways.

The design of the single and double boundary kerbs, together with the full-size flower containers, provide a stylish kerbside memorial that can be effectively used to dedicate scattered ashes along straight or curved pathways.

The memorial plaques come in a range of granite colours.

	Height x Width x Depth
Single Kerbs	10cm x 10cm x 55cm
Double Kerbs	10cm x 10cm x 30cm
Vase Block	15cm x 15cm x 15cm
Plaque	10cm x 20cm

# Rose Posts

Stylish dedication of roses and trees.

A simple but effective way to dedicate roses and trees. Stylish and more substantial than metal plaques, these posts are available in a range of granites or in Rainbow Sandstone for a more natural finish.

The posts are capped with black granite plaques for inscription and optional motifs.

	Height x Width x Depth
Rose Post	45cm x 20cm x 10cm
Plaque	9cm x 19cm

# Basalt Columns

A unique and attractive informal memorial.

These naturally occurring Basalt Columns are ideal for marking the ashes scattered within natural areas such as verges and woodlands. The toughened glass plaques sit on stainless steel posts to create a truly unique memorial option.

	Height x Width x Depth
Column	90cm x 30cm x 30cm
Glass Plaque	18cm x 12cm

# Granite Benches

Traditional memorial benches.

All of our benches are available in an extensive range of granite colours. A wide choice of designs, emblems and photo plaques can be added if required.

	Width
GB 01	122cm
GB 02	132cm
GB 03	163cm
GB 04	132cm
GB 05	132cm
GB 06	137cm

# Genuine Polywood® Benches

An easy to maintain memorial bench.

The high-density polyethylene is handcrafted in the same way as natural timber to create a range of garden furniture that has proven unaffected by sun, rain, snow, wind, salt water, chlorine and mildew.

Polywood® is non-porous and uses stainless steel ground fixings and can be safely left outside all year round.

This product is made from 90% recycled material and can itself be recycled.

Available in a range of colours, sizes and designs.

	Height x Width x Depth
Traditional	90cm x 122cm x 60cm
Vineyard	90cm x 152cm x 60cm
Rockford (Small)	90cm x 152cm x 60cm
Rockford (Large)	90cm x 183cm x 60cm
Plaque	10cm x 20cm

## Colours:

- Mahogany
- Warwick Grey
- Forest Green
- Black
- White
- Teak
- Sand
- Bronze

# Children's Memorials

A range of appropriate memorials that reflect the specific needs of bereaved parents.

-  An innovative range of memorials designed for baby and children's gardens.
-  Inspired designs from butterfly plaques to trains and ponies.
-  A full inscription and design service.
-  A garden design service is available.

## Bellatrix Wing

A sculptural centrepiece.

Dedication plaques designed for children's sections and baby gardens, this double-sided memorial with 44 black granite plaques will make a stunning addition to any remembrance garden. The base is able to accommodate 12 vases. The design shown can be amended if you wish to follow a theme.

	Height x Width x Depth	Plaques
<b>Bellatrix Wing Overall</b>	105cm x 60cm x 210cm	44
<b>Plaque - Open Butterfly</b>	15cm x 18cm	14
<b>Plaque - Closed Butterfly</b>	16cm x 15cm	30

# Cherub Tear

A stunning piece of sculpture.

This beautiful, large feature memorial provides a superbly crafted centrepiece. Designed for the children's section but equally resplendent in any area of a remembrance garden. The design was inspired by the image of tears flowing down the column, creating ripples in a pool of water.

The memorial is crafted from Bahama Blue Granite and the sleeping cherub is hand-carved from Italian Marble. Forty-two Perspex teardrops adorn the column, each one suitable for inscription.

	Height x Width x Depth	Materials
<b>Cherub Tear</b>	224cm x 82cm x x82cm	Bahama Blue Granite
<b>Plaque</b>	23cm x 14cm	Glass or Perspex

# Woodland Well

A charming memorial feature.

A full-sized ornamental well made from granite and Rainbow Sandstone. With 40 large granite plaques and a cute hand-carved squirrel, this lovely children's memorial feature will provide a perfect addition to your gardens.

Accessories shown are included.

	Height x Width x Depth	Materials
<b>Woodland Well</b>	170cm x 82cm x x82cm	Rainbow Sandstone & Granite
<b>Plaque</b>	9cm x 17cm	Black Granite

# Pony and Train

Goodnight Pony and the Sleeper Train.

A popular re-working of our boundary kerbs, these granite memorials form an ideal kerb edging to paths and scatter lawns within the children's section of your gardens. The carriages house a single plaque and can be adapted to securely hold ashes if required. The train engine and pony can be left natural or painted.

	Height x Width x Depth
<b>Sleeper Train</b>	25.3cm x 56.9cm x 13.7cm
<b>Goodnight Pony</b>	25.4cm x 28.6cm x 12.7cm
<b>Carriage</b>	12.5cm x 27.7cm x 12cm
<b>Plaque</b>	10cm x 14.8cm

# Support Services

Supporting customers throughout the lifecycle of our products.

Greenbridge Designs aims to provide exemplary levels of after-sales care and support, responsive to inscription/design work, managed with attention to detail.

We understand that things can, on rare occasions, go wrong but our

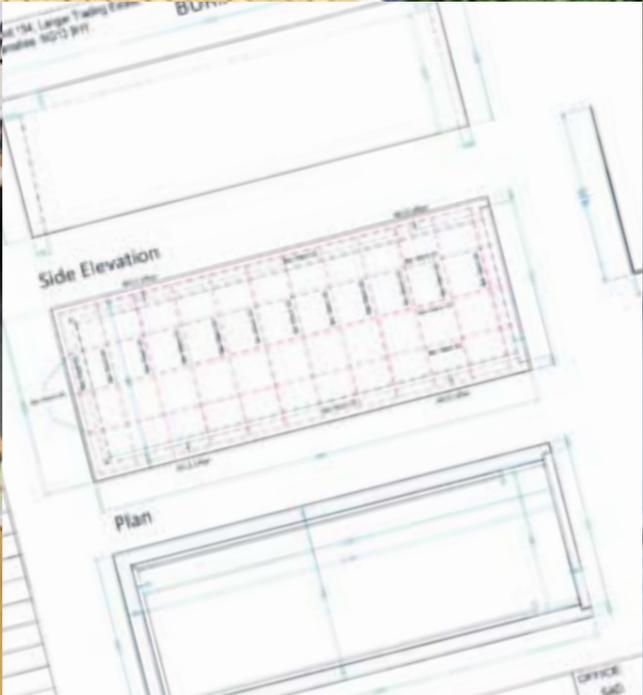

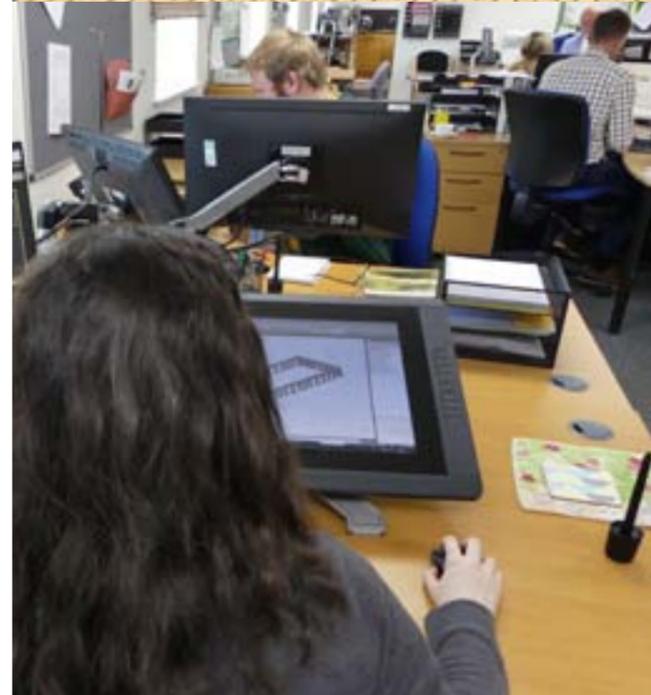

commitment to problem resolution is second-to-none; we will go the extra mile to ensure your total satisfaction. You can always rely on Greenbridge Designs to provide a responsive, professional service for the life of the product.

# Our Team, Your Vision

Our clients expect a high level of service from us and we deliver every step of the way. A small, highly proficient account management team is backed up by a large support staff, delivering excellence in everything they do.

We can help you to shape your vision into a deliverable plan that will suit your needs and conform to your high standards. Whether you're looking for products straight from our brochure, or you'd like to work with our team to design something unique, you'll feel safe knowing that your project goals will be met.

At Greenbridge Designs, our customer service will make all the difference. Our customer-centric approach, aligned with an experienced creative team, will enable you to bring your visions to life. We can provide design ideas and high-quality computer models to illustrate how the final design will look in your cemetery or crematorium, offering help and consultancy at every stage. Once you're happy that we've captured your ideas, we'll ensure that the teams and our project plan are all aligned and get to work on making them reality.

# Expert Professional Team

For large or complex projects, our structural engineer and architects will take the agreed model and location information and start drawing up project plans. Our expert team takes careful consideration of things like the bespoke design features, the structural integrity of each component, drainage needs and soil-type considerations, amongst others. Once approved, we can assist with drawings for local planning permissions, where required, and be there to offer friendly advice and assistance whenever you need it.

Our professional team of architects, civil and structural engineers will consider every detail to minimise any potential issues and ensure we deliver a first-class product every time.

# Creative Flair and Modern Artistry

Our incredible craftspeople and women set the standard for their field. From their regular designs that ornately decorate plaques and memorials, to the faithfully recreated bespoke artwork that reflects the achievements and interests of loved ones, you'll find you're in good hands with the Greenbridge Designs' creative teams.

Our creativity doesn't stop there. With the latest software and specialist creators, our computer design team can create renders of your project that seem like the real thing. Always honing their craft and keeping up to date with new techniques and programmes, Greenbridge Designs offers a modern mode of design that will not only help you to visualise your project but will help you to explain your plans to others quickly and confidently.

# Safety and Project Handling

Our build team works quickly and efficiently once plans are in place. With specialist builders, structural engineers and machinery, you'll be surprised how quickly your project can be realised.

At Greenbridge Designs, we are committed to the safety of everyone working on or around our projects. Our teams are fully trained, our materials quality checked and our transport managed in-house. Every element of the build is checked before we arrive on-site. Working closely with an independent firm of health and safety consultants, we do everything possible to ensure that accidents are reduced to the absolute minimum.

For each project we produce a comprehensive health and safety plan and ensure our employees, suppliers and, of course, our customers are fully aware of our joint responsibilities. Our dedication in this area has helped us to achieve full SMAS Worksafe accreditation as a Principal Contractor. The safety of everyone involved is of paramount importance to us, as is your peace of mind that everything will be carried out professionally and safely.

# Plaque Software and Aftercare

Once your project has been completed, our dedication to excellent service doesn't stop.

To help you manage inscriptions for bereaved families, our IT department has developed bespoke software that enables you to sit together with the family and design layouts, inscriptions, add designs and photo plaques, calculate costs and order directly online.

The system manages applicants' data and maintains a database of leases. You can print everything directly from the system for families to take home, as well as obtaining 'sign-off' immediately. We've found that the inscription software greatly decreases the time our customers spend sending designs back and forth while they await layouts, leaving them more time to focus on other areas.

We've found that the use of Greenbridge Designs' plaque software offers reduced lead times on inscriptions and improves inscription accuracy, as well as offering enhanced efficiencies to benefit your own and your customers' memorial ordering experience at a very difficult time.

# Material Colours

Our granite products can be created from the following colours. If you have any specific requirements for granite or other stone types, please get in touch as we will be pleased to try to source it for you through our extensive network of producers and quarries.

## Sandstones

Rainbow Sandstone
